

MX+4™

Micro-Nutrient Mixture for Turf

MX+4 is a micronutrient blend mixed with food grade products that provides superior biostimulation. MX+4 contains beneficial microorganisms that help degrade chemical residues commonly found around turf maintenance operations. The micronutrient blend provides food for microorganisms and plants.

MX+4 contains microorganisms that will break down lignin and other common plant components. This provides food for other microorganisms in the food chain as well as establishing a better soil environment for growth of microorganisms and plants.

MX+4 Benefits:

- Micronutrient fertilization, 0.1% Iron, 0.05% Copper, 0.05% Manganese and 0.05% Zinc.
- Contains microorganisms to break down residues of pesticides.
- Contains microorganisms to break down chlorinated hydrocarbons.
- Contains microorganisms to break down plant residue.
- Helps establish a healthy soil environment.
