

pHix™

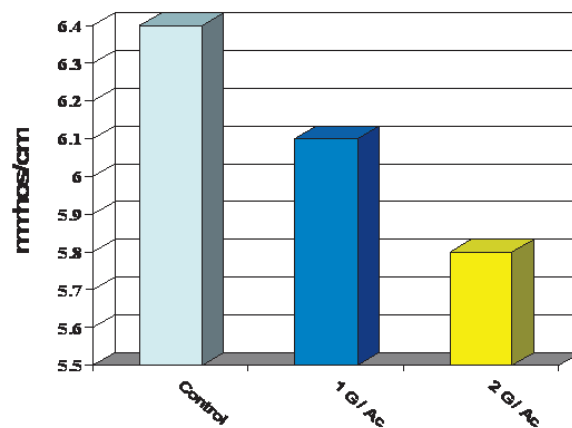

Saline Soil Treatment

Designed and formulated to help reverse the effects of salt derived soils by lowering the sodium absorption and lowering the sodium levels found in the soil.

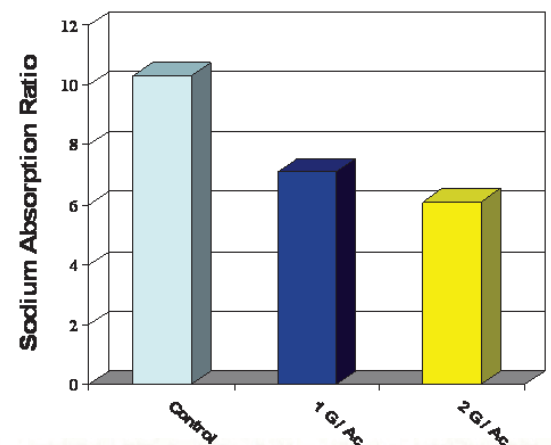

Benefits:

- Reduces Soluble Salts
- Reduces Sodium Absorption
- Reduces Sodium Levels

Soluble Salts

pHix™

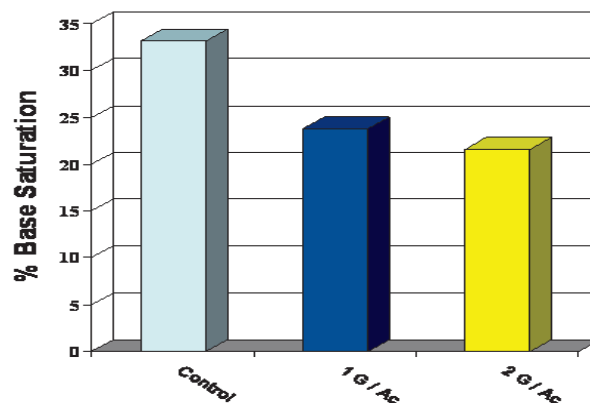

Saline Soil Treatment

pHix™ is a liquid humate product manufactured with a proprietary process using brown lignite, selected peptides and fermentation in combination with a specialized processing treatment to produce a unique organic acid complex. This process provides biosurfactants that give pHix™ many of its special properties.

Benefits:

- Reduces Soluble Salts
- Reduces Sodium Absorption
- Reduces Sodium Levels

Percent Base Saturation - Sodium

Treated
1 gal/acre

Untreated
