

Fixes Atmospheric Nitrogen

Stimulates Root Growth

Compatible with Most Starters

Promotes Better Stand

Increases Drought Tolerance

AZ Green Liquid-IF™

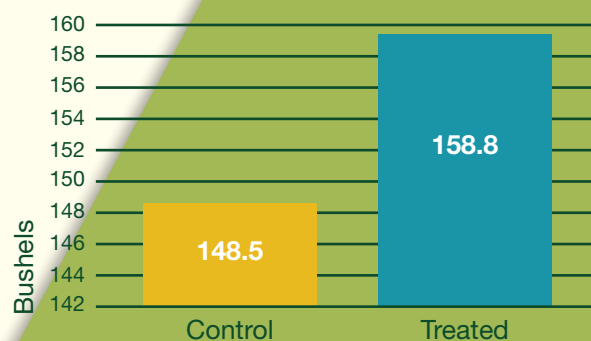

ORGANIC IN-FURROW TREATMENT FOR CORN

AZ Green Liquid-IF is an organic in-furrow inoculant for corn that contains the stabilized bacteria *Azospirillum*. It's easy to use and can be tank mixed with starter fertilizers.

The *Azospirillum* in AZ Green Liquid-IF harvests and fixes atmospheric nitrogen so that it can be used by the plant; it also exudes plantlike compounds that stimulate root development for improved nutrient uptake and increased yields. Once the planted seed germinates and the roots start to develop, the bacteria attach to the roots and begin to work.

The root stimulation effects by *Azospirillum* create even more attachment sites and an environment that allows the bacteria to thrive. The nitrogen fixing capability of the bacteria allow the plant to use nitrogen from sources other than the applied nitrogen. These functions allow the plant to better utilize the available soil nutrients.

Organic Corn Yield

Guaranteed Minimum Analysis:

2×10^4 *Azospirillum* per ml

Application Rate:

12.8 ounces per acre

2.5 gallons treats 25 acres

2 Year Shelf Life
